

Women Safety SOS

SafeGuard

Introduction

Women's safety remains a major concern in today's world, especially during travel or emergencies. With the increasing use of smartphones and web applications, technology can play a vital role in ensuring quick access to help.

Problem Statement

- *Delay in reaching help during emergencies*
- *Lack of real-time location sharing*
- *Difficulty in quickly notifying family or authorities*
- *Existing solutions are complex or slow*
- *Limited access to immediate safety tools in one platform*

Proposed Solution

We propose a web-based SOS system that allows users to trigger an emergency alert with a single click.

The system:

- *Captures real-time location*
- *Continuously tracks live movement*
- *Sends instant alerts to emergency contacts*
- *Provides a simple, fast, and user-friendly interface*

Key Features

- *One-click SOS emergency button*
- *Live location tracking (continuous updates)*
- *Instant notification to family members*
- *Real-time alert messages*
- *Custom UI (themes, fonts, colors)*
- *Stop SOS option*
- *Mobile-friendly responsive design*
- *Fast and lightweight performance*

Technology Stack

Frontend:

HTML → Structure

CSS → Styling (themes, fonts, animations)

JavaScript → Logic, geolocation, API calls ✨

Backend (AWS):

✨ Amazon API Gateway → Request handling

AWS Lambda → Processing SOS alerts

Amazon SNS → Sending notifications

Amazon Pinpoint → Push alerts

Amazon Location Service → Location tracking

System Architecture

User → SOS Button (Web App)

Geolocation API (Fetch Location)
API Gateway (Secure Endpoint)

AWS Lambda (Process Request)

Amazon SNS / Pinpoint (Send Alerts)

Family Members / Emergency Contacts Receive Notification

in kiro

Future Enhancements

- Auto-call emergency contacts
- Voice activation (hands-free SOS)
- Offline SMS fallback
- AI-based danger prediction
- Nearby police station detection
- Smartwatch integration
- Automatic alarm sound trigger

Conclusion:

The Women Safety SOS Web App provides a quick, reliable, and user-friendly solution for emergency situations.
